

NEW E-COMMERCE PLATFORM FOR INDUSTRIAL COMPONENTS DISTRIBUTOR

DELIVERS IMMEDIATE GROWTH, STRENGTHENS BRAND, AND RECAPTURES MARKET SHARE

SUCCESS STORY

Our client called on ITX Corp.'s high-growth product team to build a powerful new e-commerce platform that would regain brand trust and recapture lost market share. ITX applied a methodical, phased-in approach to deliver significant growth in orders and order value, as well as multi-session log-ins – testimony to customers' renewed confidence.

PERFORMANCE: 10-MONTH POST-LAUNCH TRENDS

↑ 242%

MULTI-SESSION LOG-INS

↑ 142%

MONTHLY ORDERS

↑ 223%

ORDER VALUE

MEET THE BRAND

Our client is a premier provider of branded and private label industrial components to the U.S. manufacturing market. With nearly 40,000 products spread across a complex hierarchy, the client combines efficient product sourcing, innovative engineering, and both subject-matter and industry support.

GOAL

Build, launch, and optimize an e-commerce platform to rebuild trust, regain confidence, and recapture market share.

STRATEGY

Before developing its customized e-commerce platform, ITX engaged the client product team in a 1-day Workshop, conducted a comprehensive technology audit, and performed extensive market research.

TOGETHER, WE IDENTIFIED FOUR IMPROVEMENT AREAS:

Establish customized e-commerce foundation

Set up complex product hierarchy & sync process

Create customer-specific pricing

Set Search Foundation

By building out a reliable, intuitive e-commerce platform, ITX quickly demonstrated its grasp of the client's underlying business challenges and the technology's role in addressing them.

UNDERSTAND THE PROBLEM

IMPLEMENTED TARGETED SOLUTIONS

ITX research revealed that our client – a global supplier of sophisticated industrial components – provides a product hierarchy deeper than most e-commerce sites. Customers whose work product is highly specialized require highly specialized materials. They also need a comprehensive, logically organized interface to help navigate myriad combinations of products and their unique attributes.

The ITX technology solution shored up our client's e-commerce platform. Reliable information architecture supported robust Search through a deep product hierarchy with multi-faceted navigation and filters specific to product type. An intuitive UI and engaging UX combined to enhance the trust and confidence between our client's brand and the customers it serves.

ITX customized a leading e-commerce solution and combined it with a front-end strategy to boost the platform's responsiveness and ease of use. By enhancing navigation of the client's vast product selection, ITX simplified product search with suggested terms, broad search, and direct match.

RESULTS

- **Multi-Session Log-ins** show customers' return and re-use of client's e-commerce platform.
- **Order count spikes**, sustains positive trend that reveals confidence boost in client's brand.
- **Order value climbs steadily**, demonstrating reclaimed market share.
- **Refined search and intuitive design** provide solid foundation for future growth & expansion.
